

BPPPP Instructor Flight Procedures Acknowledgement

March 30, 2020

Please read sign and return to ABS this acknowledgement of your responsibilities as a BPPPP accredited flight instructor.

As an ABS Air Safety Foundation-accredited instructor in the Beechcraft Pilot Proficiency Program (BPPPP) I hereby acknowledge the following:

1. The insurance endorsement provisions of the BPPPP Requirements for Flight have been deleted.
 - a. Pilots are no longer required to obtain Additional Insured and Waiver of Subrogation endorsements on their aircraft insurance policies to participate in BPPPP flights.
 - b. All other BPPPP flight authorization procedures including the required Hold Harmless Agreement remain in effect.
 - c. All BPPPP forms have been updated. I will use the new forms that are linked from the For BPPPP Instructors page at www.bonanza.org.
 - d. It is my personal responsibility to ensure that each BPPPP instructional flight I conduct is fully authorized by the ABS Air Safety Foundation prior to conducting the instructional flight.
 - e. References to insurance endorsements as part of the BPPPP Requirements for Flight have been removed from the BPPPP online courses and the ABS Flight Instructor Academy.
2. The ABS Air Safety Foundation continues to hold a high-limits liability and aircraft physical damage policy that covers me when I conduct BPPPP instructional flights.
 - a. BPPPP instructors are independent contractors.
 - b. As an independent contractor I am personally covered for liability, aircraft physical damage and instructional liability when acting in the capacity of a BPPPP instructor on a BPPPP-authorized instructional flight. This has not changed.
 - c. The provision that ABS/ASF's insurance extends to BPPPP instructors instructing in ABS-type airplanes outside of BPPPP sanctioned flights has been terminated. ABS/ASF insurance covers me **only** when I am instructing in a flight that has been preapproved by the ABS Air Safety Foundation as a BPPPP instructional flight.
